Kyla Day...

The ergonomics of the entire boat were carefully studied so that moving around on deck as well as inside is easy and comfortable. The center cockpit has an open yet protected view from the water, and also has straight access to the salon. There is a totally panoramic view from the owner's cabin as well as the salon. The transom connects the two stern sections and provides room for storage lockers, a swim ladder and a deck shower; a yacht capable of long nonstop crossings, quick day runs, fishing trips, coastal navigation's, or serious extended cruises.

The hull lines were drawn by Naval Architect Phillippe Subrero, a world-renowned specialist in passenger catamaran design, maintaining a level position, they are specifically designed for easy ocean passages, with cruising speeds in the speeds in the range of 12 to 23 knots depending on the engine selection.

This vessel is equipped with 195HP Volvo engines with 618 hrs port and 621 stbd.
